

SAP QM TABLES LIST

1. QALS : Table to store Inspection lot record
2. QAMR : Table to store Characteristic results during inspection processing
3. QAMV : Table to store Characteristic specifications for inspection processing
4. QAMB : Table to store QM: Link Between Inspection Lot and Material Document
5. QAVE : Table to store Inspection processing: Usage decision
6. QASE : Table to store Results table for the sample unit
7. QASR : Table to store Sample results for inspection characteristics
8. QAPP : Table to store Inspection point
9. QASV : Table to store Sample specifications for inspection processing
10. QPRS : Table to store Master record for phys. samples
11. TQ30 : Table to store Inspection types
12. QALT : Table to store Partial lot
13. TQ07M : Table to store QM: Inventory postings with usage decision
14. QAKL : Table to store Results table for value classes
15. T156Q : Table to store Movement Type: Material-Independent Control
16. I000 : Table to store Conditions for certificate profile
17. QALS : Table to store Inspection lot record
18. QAMR : Table to store Characteristic results during inspection processing
19. QAMV : Table to store Characteristic specifications for inspection processing
20. QAMB : Table to store QM: Link Between Inspection Lot and Material Document
21. QPCT : Table to store Code texts
22. QAVE : Table to store Inspection processing: Usage decision
23. QMAT : Table to store Inspection type : Table to store material parameters
24. PLMK : Table to store Inspection plan characteristics
25. QASE : Table to store Results table for the sample unit
26. QPMK : Table to store Inspection characteristic master
27. QASR : Table to store Sample results for inspection characteristics
28. QPCD : Table to store Inspection catalog codes
29. QINF : Table to store QM-info record for material and vendor

30. QAPP : Table to store Inspection point
31. V_TQ85 : Table to store Generierte Tabelle zu einem View
32. T352C : Table to store Catalog types for each catalog profile
33. TQ8CO : Table to store Assignment of reference orders to notification type
34. TQ81 : Table to store Notification Scenario
35. TQ81V : Table to store Usage of parts
36. TQ85R : Table to store Rules for Follow-Up Functions
37. TQ81V_T : Table to store Texts for usage of parts
38. TQ81_T : Table to store Texts for Notification Scenarios
39. TQ82 : Table to store Change of Notification Type
40. TQ83 : Table to store Partner Functions for Codes
41. TQ85 : Table to store Function table for follow-up functions
42. TQ85_T : Table to store Action box text table
43. QMEL_EXT : Table to store Extension Table for Notification
44. V_TPAR_QM : Table to store Generierte Tabelle zu einem View
45. VQQMELST : Table to store Generierte Tabelle zu einem View
46. QCVK : Table to store Certificate profile header
47. QCPR : Table to store QM quality certificates in procurement
48. QCVM : Table to store Certificate profile characteristic level
49. QCVMT : Table to store Certificate profile characteristic level: texts
50. KONDI : Table to store Conditions: Data part for certificates
51. QCVV : Table to store Certificate Profile: List of Preliminary Products
52. TQ63T : Table to store Origin of inspection specifications for certificates: texts
53. TQ61 : Table to store Result value origin for certificates
54. TQ61T : Table to store Origin of result values for certificates: texts
55. TQ62 : Table to store Output strategy for skip characteristics
56. TQ62T : Table to store Output strategy for skip characteristics: texts
57. TQ63 : Table to store Origin of insp. specs for certificates (function modules)
58. TQ64 : Table to store Origin of characteristic short text for certificates
59. TQ64T : Table to store Origin of characteristic short text for certificates: texts
